

Week 3 – Summer CSA

June 20-26, 2022

Hi everybody,

Happy first week of warmth – this week is turning in to a hot one! We welcome it, as we've been enduring slower growth for the spring, as well as slowly drying soils keeping us out of some of our fields. Now it is game on..!

These cucumbers pictured, in one of our high tunnels, are growing like crazy, and are fruiting well as they mature and the days warm. Their cooling, crisp taste is just what we're wanting... Our growing tomatoes and peppers are appreciating the boost too, and all the bright solstice sun beams that are shining down now.

Our team has been adding new crew members gearing up for the busy season, and our farm manager's wife just had their first child. Life continues in its cycles, and certainly the farm looks beautiful as it makes its upward arc for the year, absorbing these high-energy days into leaves and soils.

Box contents, Week 3:

- | | | |
|---------------------|-----------------------|---|
